CMIP7 emissions-driven runs against observations, 1850–2026

Annual tas, each member relative to its own 1850–1900 mean; thick lines are ensemble means. Continued with the medium scenario (esm-scen7-m) from 2022 where published; ACCESS-ESM1-6 and EC-Earth3-ESM-1-1 have no esm-scen7-m run yet. 2 UKESM1-3-LL members without an esm-scen7-m run are drawn to 2021 and left out of its mean.
